Summary

Full Stack Developer leveraging a strong background in finance and management and excited to keep learning new technologies. Experience working with a MERN stack and with different frameworks and libraries.

Technical Skills

Front-end: HTML5, CSS3, Javascript, JQuery, Bootstrap, Materialize, Handlebars.JS

Back-end: Node.JS, MySQL, NoSQL, Express, MongoDB

Complementing Tech: VS Code, Git, GitLab, PostMan, Terminal, MySQLWorkbench, Robo3T, Atlas

Projects

Internal Inventory System

Tech: MongoDB, React, Express, Redux, Materialize, Node.js,

Atlas

- Sourced a business client who needed an internal tool where they could store and update their inventory along with authentication for employees.
- Built out an authenticated internal tool that allows the user to input information about vendors and materials and also be able to pull the data from the database.
- I was responsible for the database, routes, and peer programmed React. Direct link: bmf-inventory-management.herokuapp.com/

Developer Profile Generator

Tech: Node.js, HTML5, CSS3, and Javascript

- Working with GitHub API to dynamically produce an HTML page with the user's profile
- By following the CLI prompts, the user can generate an HTML page containing their GitHub stats and styled with their favorite color.

Employee Tracker

Tech: Node.js, MySQL, and Javascript

- This program uses CRUD actions to manage an employee management database
- The user will be able to create employees, departments, and roles as well as view existing ones in the database. The user will also be able to maintain the database by updating or deleting the departments, employees, or roles using the CLI.
- Direct link to project repo: github.com/efrenmarin45/Employee-Tracker

Code Quiz

Tech: HTML5, CSS3, and Javascript

- This is a timed interactive quiz that tests the user's knowledge on CSS3, Javascript, and HTML5
 - This program asks the user to help Harry, better understand some HTML, CSS, and Javascript questions by taking a timed quiz. As the user progresses through, any wrong answers will have a time penalty and any correct answers will award points.
